

BUCYENSENGETHIERRY

AI/ML Engineer

bucyensenge.thierry@aimail.com | +1 (350) 983-9717 | West Valerie, MT | linkedin.com/in/bucyensenge-thierry |
github.com/bucyensenge-thierry

PROFESSIONAL SUMMARY

Innovative AI Engineer with 9 years of experience in cutting-edge machine learning research. Specialized in transformer architectures and generative AI.

TECHNICAL SKILLS

ML Frameworks: PyTorch, TensorFlow, Keras

NLP: BERT, spaCy

Computer Vision: Detectron2, MediaPipe

MLOps: Azure ML, Kubeflow

LLM Technologies: LlamaIndex, GPT-4, Vector DBs

Languages: Python, R, SQL

Cloud AI: AWS SageMaker, Google Cloud AI

Databases: Weaviate, Couchbase, Cassandra

PROFESSIONAL EXPERIENCE

Senior AI/ML Engineer | February 2017 - May 2019

Jacobs and Sons AI Labs - Port Donna, VI

- Developed NLP model achieving 95% accuracy on text classification
- Published 3 research papers in top-tier AI conferences (NeurIPS, ICML, CVPR)
- Implemented MLOps pipeline reducing model deployment time from weeks to hours
- Built recommendation system increasing user engagement by 46%

Machine Learning Engineer | January 2019 - September 2020

Johnson, Parker and Gray AI Labs - East Rachel, NJ

- Built recommendation system increasing user engagement by 55%
- Fine-tuned large language models improving accuracy by 35%
- Reduced model inference time by 75% using optimization techniques
- Implemented MLOps pipeline reducing model deployment time from weeks to hours
- Published 3 research papers in top-tier AI conferences (NeurIPS, ICML, CVPR)

AI Research Engineer | November 2021 - March 2023

Cooper-Austin AI Labs - Samanthaville, MN

- Implemented MLOps pipeline reducing model deployment time from weeks to hours
- Built recommendation system increasing user engagement by 27%
- Fine-tuned large language models improving accuracy by 36%

KEY PROJECTS

LLM-Powered Code Assistant | Built an intelligent code completion and review system using GPT-4 and custom fine-tuning

Technologies: Python, PyTorch, Hugging Face, FastAPI, PostgreSQL

Impact: Increased developer productivity by 40% across 200+ engineers

Real-time Object Detection Platform | Developed scalable computer vision platform processing 1000+ video streams

Technologies: TensorFlow, OpenCV, Kubernetes, Redis, gRPC

Impact: Reduced false positives by 65% compared to previous system

Automated ML Pipeline | Created end-to-end AutoML platform for model training, evaluation, and deployment

Technologies: MLflow, Kubeflow, Docker, AWS SageMaker, Python

Impact: Reduced model deployment time from 2 weeks to 4 hours

EDUCATION

Master of Science in Artificial Intelligence - Whitemouth University (2013) | GPA: 3.97

Bachelor of Science in Software Engineering - South Elizabeth State University (2014) | GPA: 3.68

CERTIFICATIONS

- AWS Solutions Architect Professional
- Azure AI Engineer Associate
- DeepLearning.AI TensorFlow Developer

PUBLICATIONS

- A Novel Approach to Self-Supervised Learning - CVPR (2022)
- A Novel Approach to Few-Shot Learning - ICLR (2022)
